12 Recommendations, 1 Impacted Subscription, 6 Impacted Resources

Category	Recommendations	Impacted Subscriptions	Impacted Resources
Security	6	1	4
Reliability	4	1	4
Operational excellence	1	1	1
Performance	1	1	1

Details

Subscription: Azure subscription 1 (9488b143-b2fa-4486-b0db-5902bbe7cf00)

Category	Business Impact	Recommendation	Potential benefits	Impacted resources
Security	High	Disabled accounts with read and write permissions on Azure resources should be removed	Prevent potential security breaches	1 Subscription
Security	High	Disabled accounts with read and write permissions on Azure resources should be removed	Prevent potential security breaches	1 Subscription
Security	High	There should be more than one owner assigned to subscriptions	Prevent potential security breaches	1 Subscription
Security	High	Internet-facing virtual machines should be protected with network security groups	Prevent potential security breaches	1 Virtual machine
Security	Medium	Machines should have a vulnerability assessment solution	Prevent potential security breaches	1 Virtual machine
Security	Low	Subnets should be associated with a network security group	Prevent potential security breaches	1 Subnet
Reliability	High	Create an Azure Service Health alert	Get alerts on service, security, and health issues	1 Subscription
Reliability	High	Enable zone redundancy for storage accounts to improve high availability and resiliency	Achieve higher availability for the application	1 Storage Account
Reliability	Medium	Align location of resource and resource group	Reduce the impact of regional outages	1 Virtual machine
Reliability	Medium	Use NAT gateway for outbound connectivity	Prevent outbound connection failures with NAT gateway	1 Virtual network
Operational excellence	High	Enable Trusted Launch foundational excellence, and modern security for Existing Generation 2 VM (s)	Boost Gen2 VM security by protecting against rootkits	1 Virtual machine
Performance	Medium	Upgrade to the current generation virtual machines	5 VM offers improved core, storage, and network performance	1 Virtual machine
